SUMMARY

Flutter Developer and Mobile Application Developer with 3+ years of hands-on experience developing cross-platform mobile applications using Flutter and Dart. Experienced in Flutter application development, RESTful API integration, Firebase, local databases, state management, Clean Architecture, MVVM, BLoC, and Cubit. Strong foundation in object-oriented programming, software engineering principles, responsive UI development, and Git-based development workflows. Experienced in developing academic, personal, freelance, and team-based mobile applications. Seeking a Flutter Developer or Mobile Application Developer position to contribute to real-world applications while continuing to grow as a professional software engineer.

PROFESSIONAL EXPERIENCE

Startup Company, *Mobile Application Developer* 08/2026 – Present | Gaza, Palestine

• Develop cross-platform mobile applications using Flutter and Dart. • Implement responsive and reusable user interfaces based on application requirements and design specifications.
• Integrate RESTful APIs and manage application data and state.
• Apply software engineering principles and maintainable Flutter development practices.
• Collaborate with development team members throughout the application development lifecycle.

CodeMap at Taqat Company 07/2026 – Present | Gaza, Palestine

Software Engineer and Mobile Developer Trainee

- Diagnosed and resolved a critical silent-failure bug where new user registrations appeared to fail on the client but were actually persisting in the database, caused by Render.com free-tier cold starts exceeding the Dio timeout threshold; built a custom RetryInterceptor that automatically retries on timeout without duplicating requests, eliminating phantom signup failures entirely.
- Architected a Flutter mobile fitness app with a Laravel REST API backend, implementing Clean Architecture across domain, data, and presentation layers with feature-first folder structure and BLoC/Cubit state management.
- Engineered a dual-role system (User / Coach) with differentiated onboarding flows, profile management, and role-specific feature sets.
- Implemented a resilient local caching strategy (remote-first, cache-on-success, fallback-on-failure) with partial field diffing on profile updates, sending only changed fields via PATCH to minimize unnecessary network traffic.
- Designed a custom DioClient with interceptors for auth token injection, error normalization, and retry logic, surfacing backend message fields through a typed ServerFailure model to meaningful UI-level feedback.
- Identified and fixed a data contract mismatch between the Flutter frontend and Laravel backend (allergies field serialized as String vs. expected List<String>), adding input parsing and updating the payload builder to enforce correct types at assembly time.

Developers Plus Company, *Mobile Developer Trainee* 06/2022 – 09/2022 | Gaza, Palestine

• Developed mobile application features using Flutter and Dart.

• Built responsive and reusable Flutter user interfaces.
• Integrated RESTful APIs into mobile applications.
• Implemented local data storage and application functionality.
• Applied object-oriented programming and Flutter development principles.
• Gained practical experience in professional software development workflows.

EDUCATION

Al-Azhar University, *Bachelor of Computer Science* 2020 – 2024 | Gaza, Palestine
Faculty of Engineering and Information Technology
GPA: 87.3% | 3.49/4.00 | Second Class Honors

Al-Azhar Gaza Institute, *High School Diploma – Scientific Stream* 2017 – 2020 | Gaza, Palestine

TECHNICAL SKILLS

Dart | HTML | CSS | JavaScript | Java | OOP | Flutter | Cross-Platform Mobile Development | Responsive UI | Clean Architecture | MVVM | MVC | Repository Pattern | SOLID Principles | BLoC | Cubit | Provider | GetX | RESTful APIs | JSON | HTTP | Firebase | Hive | SQLite | Shared Preferences | Git | GitHub | Android Studio | Visual Studio Code | Postman | Figma | Error Handling | Responsive Design

SOFT SKILLS

- Communication
- Problem Solving
- Time Management
- Teamwork and Collaboration
- Critical Thinking
- Continuous Learning

CERTIFICATES

Clean Architecture in Flutter (Udemy | February 2026 | 8 hours) |
Relationships Engineering for Engineers Training Course (Association of Engineers, Gaza | June 2025 – July 2025 | 15 hours) | **Freelance Skills Training** (Digiwork | 30 hours) | **Clean Architecture in Flutter** (Clean Architecture in Flutter — Udemy | October 2024 | 11.5 hours) |
Flutter Advanced Course – BLoC and MVVM Pattern (Udemy | July 2024 | 16 hours) |
Flutter and Dart Development Course (Udemy | August 2023 | 42 hours) | **Flutter Development Guide** (Udemy | September 2023 | 77 hours) | **The Complete Dart Learning Guide** (Udemy | March 2023 | 12.5 hours)

PROJECTS

Gym App, *Technologies: Flutter, Dart, Hive, BLoC/Cubit, Clean Architecture*
• Developed a mobile fitness application for managing exercises and workouts.
• Implemented workout and exercise management functionality.
• Used local data persistence for storing application data.
• Applied feature-based architecture and reusable Flutter components.

Notes App, *Technologies: Flutter, Dart, Hive, MVVM*
• Developed a local notes management application.
• Implemented create, read, update, and delete (CRUD) operations.
• Used Hive for local database storage.
• Applied the MVVM design pattern to separate presentation and application logic.
GitHub: github.com/Haya-Mohammed/my_notes

Books App, *Technologies: Flutter, Dart, RESTful API, Hive, Clean Architecture*
• Developed an e-book browsing application using RESTful API integration.
• Implemented book browsing and book details functionality.
• Used local data persistence.
• Applied Clean Architecture principles to separate presentation, domain, and data layers.

News App, *Technologies: Flutter, Dart, RESTful API*
• Developed a mobile news application using RESTful APIs.
• Implemented news browsing by categories including sports, science, and politics.
• Integrated API data into Flutter user interfaces.
• Implemented article sharing functionality.
GitHub: github.com/Haya-Mohammed/news_app

Social App, *Technologies: Flutter, Dart, Firebase*
• Developed a social media mobile application using Firebase.
• Implemented post creation and post browsing functionality.
• Implemented comments and likes.
• Integrated Firebase services for application data management.
GitHub: github.com/Haya-Mohammed/social-app

Shop App, *Technologies: Flutter, Dart, RESTful API*
• Developed an e-commerce mobile application using Flutter and RESTful APIs.
• Implemented product browsing and product details.
• Implemented shopping cart functionality. • Integrated API data with the Flutter application.
